

HD Camera Connector

OVERVIEW

The Camera Connector integrates with up to 4 compatible camera feeds for additional visibility inside or around your vehicles. This self-install accessory enables you to connect side, rear, or interior feeds in addition to Samsara AI Dash Cam feeds. Easily retrieve up to 70 hours of HD video over-the-air through the Samsara dashboard to protect your company from false blame. Assist drivers in real-time by connecting to compatible in-cab monitors.

SOFTWARE FEATURES

- On Demand Video Retrieval: Pulls 1 minute of footage and any duration of hyperlapse video
- Trip Stills: Automatically uploaded every few minutes with the option to request additional stills on-demand
- Automatic Dashboard Activation

SUPPORTED VIDEO CONNECTORS

GX12 Connector

HIGHLIGHTS

- Connect up to 4 third-party cameras into the Samsara dashboard
- Full integration into Samsara platform, including safety events, video retrievals, coaching workflows, and live streaming
- Retrieve footage from up to 70 hours of drive time
- Quick and simple self-installation
