

Connectivity for essential services during times of emergency.

Enhance utility reliability with the Samsara VG55-FN Vehicle Gateway, now FirstNet Trusted™

FirstNet® built with AT&T, is the only nationwide communications network built with and for America's first responders, and those who support them. With priority and preemption, FirstNet gives utility companies such as electric, gas, water and sewer a line of communication with first responders during times of congestion. By helping maintain fleet visibility, FirstNet also allows you to make informed, safe and rapid responses when restoring critical infrastructure.

Samsara's VG55-FN Vehicle Gateway, which is now FirstNet Trusted™ and available for use on FirstNet®, is an advanced sensor platform that empowers dispatchers and managers to capture near real-time vehicle and driver data in the cloud to improve fleet safety, efficiency, and productivity.

With Samsara's GPS tracking, remote diagnostics, and more, the Vehicle Gateway allows you to harness the data you need to optimize routes, fuel and energy use, vehicle maintenance, compliance, and driver management.

Samsara on the FirstNet Network

- FirstNet Trusted™ Device
- Supports First Priority™—which includes priority and, for first responders, preemption capabilities
- Advanced & augmented coverage — urban to rural
- Maintain always-on priority across Band 14 and all AT&T commercial LTE bands

Highlights

- High-speed connectivity: 4G LTE cellular with built-in Wi-Fi hotspot for mobile devices
- Remote diagnostics: Key vehicle data such as engine state, fuel level, mileage, and fault codes
- Unified platform: Unlocks a wide array of customizable reports and alerts as part of Samsara's Connected Operations Cloud
- 24/7/365 multi-lingual, multi-channel support

FirstNet® and the FirstNet Trusted™ badge are registered trademarks and service marks of the First Responder Network Authority.
